# **About Company**

**Termoclip** – Russian manufacturing company, since 2003

#### **Products:**

- Fasteners for buildings and constructures
- Drainage systems and roof ventilation

#### **Key benefits:**

- High tech
- Reliable and durable
- Unique and patented
- Insured warranty

### **About Company**

The use of Termoclip fastening products in industrial and civil engineering unveils great opportunities, providing reliability, practicability and durability of constructions:

- High ageing resistance and resistance to fatigue of polymer parts are implemented as a result of structural and technology production solutions with the use of high-quality materials.
- In-place tests at the Central Research Institutes of the Russian Federation have confirmed the range of operating temperatures from -50°C to +80°C.
- The polymer materials used in the production guarantee high resistance of Termoclip products to UV exposure and frost allows to apply them in different climatic conditions.
- The metal parts are made of corrosion-resistant or carbon steel with the anti-corrosive resistant coating to resist environmental factors during the service life.
- The rivets have passed rupture load tests in accordance with R ISO 14589-2005 Russian National Standard, and corrosion behavior tests.
- Earthquake resistance to 9 points is confirmed by field tests.
- The wide range of fastening parts and easy installation minimize a human factor at their installation.
- TERMOCLIP fastening equipment has all necessary documents in accordance with the Russian Federation standards: the certificate of conformity, the specialized technical certificate of the Russian Federation, the sanitary-epidemiological and fire-prevention conclusion certificates.

#### Vision and Values

#### Vision:

 Innovative solutions In the technological process at own production -EXCELLENT PHYSICAL AND MECHANICAL PROPERTIES and always High Quality of our products.

#### Values:

- People! employees, partners and customers.
- High tech!
  Innovation, craftsmanship and quality.
- Sustainability!
  Stability, efficiency and reliability.

# **Product Categories**

14 1 3 40

- 1 Fastening metal panels
- 2 Fixing of roofing materials
- 3 Fixing of facade materials
- 4 FIXINGS technical insulation
- 5 Roofing Systems of the Drainage and Ventilation
- 6 Tools and Accessories

Sales Volume

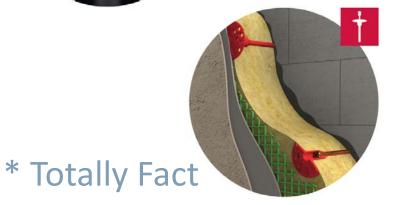

1 000 000 000 pcs

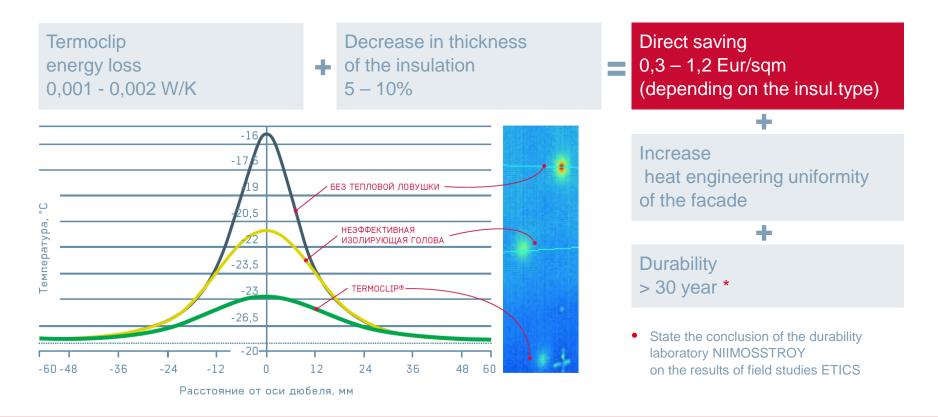

First billion!

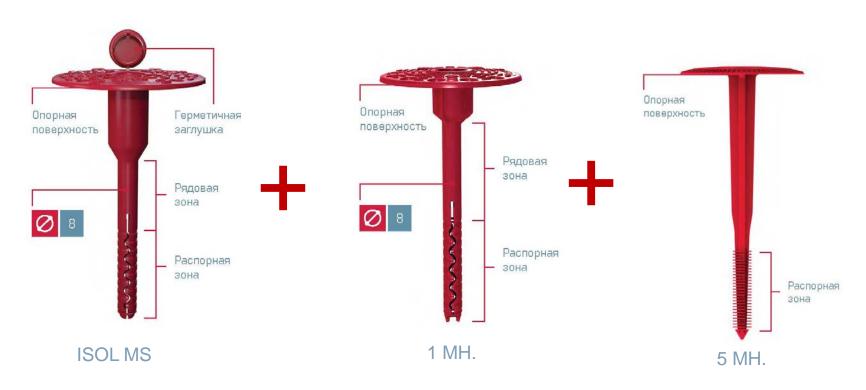

### Key Advantages: decrease in operating costs

Thermotechnical homogeneity - High levels of energy efficiency anchors Termoclip, allow the design of façade systems with thermal insulation of smaller thickness.

**TERMOCLIP** T90 04.05.2016 **14** 

### Key Advantages: savings with the best quality

Engineering approach provides savings without compromising on quality!

# Key Advantages: The insured warranty

Insurance liabilities:

Unconditional producer responsibility for the entire assortment of production

The amount of insurance coverage: 10 000 000 RUB

Warranty:

5 years

## Key Advantages

of Fastening

### We strive for innovation!

Sustainability Performance

**Technical Support** 

Guarantee Insurance 5Y
